SLLS ANTI-HARASSMENT POLICY

The Society for Longitudinal and Lifecourse Studies (SLLS) convenes conferences and events with the purpose of promoting professional development, and scholarly and educational exchange of ideas in the spirit of free inquiry and free expression.

The SLLS is committed to providing a safe, respectful and welcoming event environment for all participants, free from harassment based on age, race, ethnicity, national origin, religion, language, sexual orientation, gender identity or gender expression, disability, health conditions, socioeconomic status, marital or domestic status, political affiliation, or parental status. Harassment consists of a single intense and severe act or of multiple persistent or pervasive acts which are (or perceived to be) demeaning, abusive, offensive towards an individual person or create an intimidating, hostile or degrading environment.

Participants at SLLS events are expected to abide by this Anti-Harassment Policy in all meeting venues as well as official and unofficial social gatherings. Hence participation in any SLLS event constitutes acknowledgement of, and agreement to abide by this policy.

If you are confronted with a difficult or even conflictual situation, or if you face bullying or harassment, or if you need advice, you can contact the SLLS representative Ludovica Gambaro (gambaro@dji.de), or the ULB Care Unit (care@ulb.be), in complete confidence.

EMERGENCY CONTACT NUMBERS

- Police: 101
- Fire / Ambulance: 112

If you experience or witness a medical emergency, an accident, or an assault, or if you have found a suspicious object, you can contact the Protection and Safety unit (Service protection et sécurité).

From any ULB landline, please dial the following number as soon as possible:

- 8888

From a mobile phone:

- +32 2 650 26 14

Explain the situation calmly and clearly, including location, and provide your name and telephone number. Do not hesitate either to use - in case of emergency only - the yellow emergency phone boxes on campus.

CLOSER

Population Research UK (PRUK)

Panel Study of Income Dynamics (PSID)

UCL Centre for Longitudinal Studies (CLS)

CLOSER, the home of longitudinal research, is the interdisciplinary partnership of leading social and biomedical longitudinal population studies. Our mission is to increase the visibility, use and impact of longitudinal population studies, data and research to ensure that longitudinal evidence is used to address the health, social, economic and environmental challenges facing the UK, now and in the future.

Our suite of free resources help researchers of all career stages to:

Discover the data you need

Our tools and resources make it easier than ever to find, access and explore UK longitudinal population study (LPS) datasets and contextual data, all in one place.

Build your skills and confidence

Our education and training resources equip researchers at every stage with the knowledge and skills to analyse, curate and work effectively with LPS data.

Understand the bigger picture

Dive deeper into longitudinal population studies with resources designed to help you make sense of complex datasets and unlock their full research potential.

Turn your research into impact

We help you mobilise your findings confidently in the policy landscape, so your work informs the decisions and debates that matter.

Connect and collaborate

Join a thriving community of practice, bringing together researchers, data managers, policymakers and educators to share knowledge and drive LPS research forward.

Stay at the cutting edge

Access the latest tools and software designed to streamline your work, from metadata production to cross-study comparison.

We are funded by the UKRI Economic and Social Research Council.

www.closer.ac.uk

Population Research UK (PRUK) is an initiative dedicated to maximising the potential of Longitudinal Population Studies (LPS) in the UK across social, economic and biomedical research.

Established by the Economic and Social Research Council and the Medical Research Council, PRUK is supported by a £9 million investment from the UK Research and Innovation Infrastructure Fund to deliver and commission services that enhance population research.

Through strategic commitment in data discovery, access, linkage, coordination, advocacy and training, PRUK aims to build an interconnected research environment, making longitudinal data more accessible and impactful.

PRUK is co-developed by the University of Bristol, University College London, Swansea University, CLOSER and UK Longitudinal Linkage Collaboration.

Aim

Our aim is to achieve more effective interdisciplinary use of longitudinal data and greater impact through empowering users and informing policy.

Objectives

We focus on five key objectives to drive change:

- Coordinate and advocate for the LPS community
- Enhance discovery capabilities for LPS
- Streamline data access processes and mechanisms
- Facilitate LPS linked data use
- Build capacity and skills for LPS

Vision

Our vision is for a simplified, interconnected data landscape where LPS users experience a seamless journey – from discovering and accessing data to conducting meaningful research.

Mission

Our mission is to harness the power of LPS assets to create a research environment where longitudinal studies reach their full potential – enabling groundbreaking discoveries and real-world impact.

PANEL STUDY OF INCOME DYNAMICS

INSTITUTE FOR SOCIAL RESEARCH • SURVEY RESEARCH CENTER

www.psid.org

[@umpsid.bsky.social](https://twitter.com/umpsid)

The Panel Study of Income Dynamics (PSID) is the world's longest running national household panel survey. Begun in 1968, the PSID has collected 44 waves of data from the same families and their descendants for over 58 years. More than 9,000 families participate in the PSID in recent waves, including two refresher samples of new immigrant families. Because PSID follows descendants of original sample members, it is a unique source for studying the intergenerational transmission of health and economic wellbeing.

Current Questionnaire Content

Employment & Wages	Marriage & Fertility
Income & Wealth	Health Status & Behaviors
Expenditures	Health Insurance
Education	Mortality
Mortgage Distress & Foreclosures	Program Participation
Pensions	Computer & Internet Use
Philanthropy	Housing Characteristics
	Time Use

Interested in learning more about PSID data? Please see our Getting Started page to learn about the study and sample, supplemental studies, and how to download data through our online Data Center.

Child Development Supplement (CDS) & Transition into Adulthood Supplement (TAS)

Measures of child/adolescent cognitive, physical, social and behavioral development as well as unique comprehensive national time-use information on children and youth of all ages.

Original CDS & TAS: Three waves of CDS data on 3,500 children aged 0-12 from PSID families who were first interviewed in 1997, re-interviewed in 2002 at ages 5-18, and again in 2007 at ages 10-18.

- Six waves of TAS data were collected biennially from 2005-2015 for CDS young adults ages 18-28.

Ongoing CDS & TAS: 4 new rounds of CDS are now available collected from all sample children ages 0-17 (CDS-2019, CDS-2020, CDS-2021 and CDS-2024).

- TAS-2023 has been released and the 11th wave of TAS have been collected from young adults ages 18-28 in all PSID families, regardless of Original or Ongoing CDS participation.

The vast majority of data are freely accessible through the web-based Data Center which provides customized datasets

Welcome from the President

Greetings SLLS Colleagues!

It is my great pleasure to welcome you to the 2026 meeting of the Society for Longitudinal and Lifecourse Studies, being held at the Universite Libre de Bruxelles (Free University of Brussels). Our very timely theme this year is *Structure and Change in Critical Times: Implications for the Life Course*. The need for fresh and high-quality data ensures that we will continue to have plenty of work to do - to describe, characterize and analyze the changing and context-specific shape of the life course, and the degree to which earlier life circumstances and opportunities are allowed to impact subsequent life course experience.

The conference program features a rich and lively set of opportunities for learning and discussion of such topics - a diverse and intriguing range of concurrent sessions offering fresh findings and insights from multiple national contexts, including outstanding keynote speakers, and this year a special “Meet the Editors” session offering insights from present and past editors of several leading journals. As always, the meeting also offers ample opportunities for informal interaction with colleagues old and new, from nearby and across the globe. The range of formal and informal sources of information and intellectual inspiration creates a great opportunity for advancing our ongoing research efforts as well as stimulating new ideas and directions for scholarship.

The conference is preceded by a full-day workshop, *Beyond Correlation: A Researcher’s Toolkit for Causal Reasoning*, presented by Jelle Van Cauwenberg, Université Libre de Bruxelles.

I know you will want to join me in expressing appreciation and gratitude to our conference sponsors CLOSER (UCL), Population Research UK (PRUK), UCL Centre for Longitudinal Studies (CLS), and the Panel Study of Income Dynamics (PSID).

Please also join me in expressing our great appreciation to Bram Vanhoutte and his team for hosting the conference. It has been a real pleasure to work with Bram and his dedicated colleagues as we together confronted some special challenges for this year’s meeting. Bram and his team have worked tirelessly to ensure that the conference experience will be productive, smooth and enjoyable for all of us. We also all owe a huge debt of thanks to Cat Westlake, SLLS Executive Administrator. Much of Cat’s careful work for SLLS occurs behind the scenes. At every stage of the planning process, Cat has helped make sure that things are organized to run well and smoothly.

Welcome to Brussels, and have a wonderful conference!

Dale Dannefer

Welcome from the Hosts

We're delighted to host the annual meeting of the Society for Longitudinal and Lifecourse Studies (SLLS) and welcome you all at the École de Santé Publique (ESP) of the Université Libre de Bruxelles.

We hope these few days will leave you with an impression of the much-needed embrace of diversity, openness and space for dialogue Brussels represents. *The Université Libre de Bruxelles (ULB)*, established in 1834, was based on the foundation of free enquiry and critical thinking, against dogma, but in a spirit

of tolerance and respect for differences of opinion. A longstanding tradition of research and excellence, crowned with four Nobel prizes, one Fields Medal and three Wolfs Prizes, as well as 49 European Research Council grants over the past few years, make the University a well-respected research institution on an internationally competitive level. It has hosted one of the most notable conferences in the past, the 5th Solvay Conference in 1927 on quantum physics, which led to what has been named the most intelligent group picture ever taken, as 17 of the 29 conference attendees were (or became) Nobel Prize winners. Just so you know I have high hopes for all of you, and to make sure you do not forget to take pictures of who you meet - the standard for meetings at this university is high!

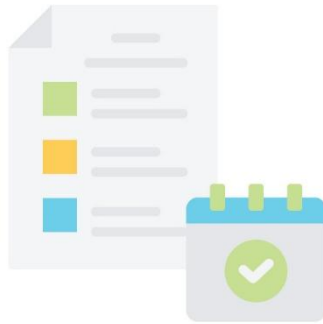

The *School of Public Health* of the ULB, from its inception in 1963, has had ideas central to the conference such as linked lives and social context in its program: one of its founding members, Prof. Marcel Graffar, developed a multidimensional index for socioeconomic position of children that is still used today in family medicine. As an interdisciplinary school, it brings together the expertise of several research centres, in health care management, environmental health, health policy, social approaches to health and epidemiology, and offers several master's programs and short courses, including an English language specialized degree in Public Health Methodology.

The conference theme, *Structure and Change in Critical Times: Implications for the Life Course*, highlights key features of many contributions of the research presented at this conference: studying how the structuring influence of social conditions is combined with the dynamics of life course development in a specific historical timeframe. But it also underlines the feeling that we are living in critical times, where research on the life course should not be independent of societal debates, but offer insight and contribute to both informing the public at large and shaping policy, instead of staying siloed in academic circles. I hope this conference can contribute to that aim and showcase what we as experts have to offer to the world.

Finally, we would like to thank everyone who contributed to the fluid organization of this conference, both centrally at SLLS and here at the ESP, with special mention to Cat, Yasmina, Thibault, Damiano, Blanche, Nathy and Audrey.

In name of the organizing team,

Bram Vanhoutte

The home of longitudinal research

CLOSER, the home of longitudinal research, is the interdisciplinary partnership of leading social and biomedical longitudinal population studies.

We work to increase the **visibility, use and impact** of longitudinal population studies, data and research to ensure that longitudinal evidence is used to address the health, social, economic, and environmental challenges facing the UK, now and in the future.

 Kathrin Komp-Leukkunen, LUT University (via Zoom); Tim Liao, University of Illinois

Peer reviewed scholarship remains the currency of the scientific enterprise and of acknowledgment of scholarly contribution and relevance. This session convenes a panel of current and former editors from journals that publish longitudinal and life course research. They will discuss strategies for success in the peer review process and trends in publishing from their perspective “behind the desk.” Attendees will learn about the publishing priorities of each of the journals represented. Ample time will be dedicated to audience questions.
